

Summer Camp

A Robotic Adventure...

takes daycampers (grades 4-8) on a fun and fact-filled expedition through a themed summer camp. Combined with LEGO Robotics sets and RoboLab software, the camp curriculum spans two weeks. Campers build numerous robots to explore and perform tasks that range from the simple to the complex.

Program Highlights:

- 2 Week Duration
- 4 Hours per Day
- Fieldtrip(s)
- T-Shirt
- FIRST Robotics Demonstrations
- Includes Daily Snack
- Loads of FUN!
- Scholarships Available

It has been called the... Superbowl of Smarts

BadgerBOTS is a robotics competition team comprising high school students and local adult software, business, and engineering mentors. This experience leads students to greater academic success, inspiring them to careers in business, graphic arts, science, and engineering. Many post-secondary colleges and universities offer FIRST Robotics specific scholarships.

We need your help!

Your contribution allows students to experience an engineering and team building project.

Some of our accomplishments:

- Rookie All-Star Award
- Engineering Inspiration Award
- National Championship Qualified
- Sponsor of LEGO League Teams
- LEGO Robotics Summer Camps
- "Tech Cart" After School Program
- 100's of annual presentations

Please allow us to schedule a meeting to talk about the team, its success, and how you play a critical role in continuing to provide the BadgerBOTS experience.
